## Summary

My background is in robotics and AI. I completed my PhD in 2016 from HKUST (18th at QS World University Rankings in Engineering and Technology 2020). I had worked on projects related to place recognition at ETH Zurich during my PhD studies. I worked at CUHK and UF, focusing on computer vision technologies. In addition to research, I have entrepreneurial experience. I previously served as the co-founder and Chief Operating Officer of Lisee Technology Corporation Limited, a Hong Kong-based startup that provided indoor navigation services using visible light communication technology. Additionally, I held a director position at Friends Corporate Technologies, where I introduced Dalocation.com, a dynamic real estate mapping platform. I am a dedicated individual with strengths in project management, market research, team building, proposal writing, and presentation skills. My work has been recognized with awards, such as the Audience Award from the HKUST President at the Campus Challenge @ HKUST Transportation event in 2018. I have also presented at the IET-YPEC event at the City University of Hong Kong. My company, Lisee Technology, has received significant funding support, including HK\$160,000 from the Proof-of-Concept Fund at HKUST in 2018 and HK\$300,000 from the Technology Start-up Support Scheme for Universities in Hong Kong in 2019. I am passionate about research and development and enjoy turning ideas into reality. My full profile is available at <https://usmanmaqbool.github.io/>.

PhD

Sep 2016 - Feb 2021

- PhD Supervisor: [Prof Ming Liu](#), Director of Robotics and Multi-Perception Lab (RAM-LAB)
- Research Contributions as First Author**
  - Place Recognition:** Our work makes a leap towards hierarchical deep learning-based place recognition for multiagent SLAM systems. We introduce a probabilistic layer to constrain the local representation along with the global representation of images. The global description of the pre-trained model and the local consistency introduced in our work enables the system to yield good performance at large-scale.

Pak-China Friendship Centre,  
Islamabad

#### Panelist

Feb. 2023

- 'I emphasize taking the voluntary initiative by the tech industry first. Companies should realize that they need academic involvement to grow at a swift pace. Most VPs of big companies belong to academia.
- 'In return, companies would at least solve their quality hiring problems. Usually, universities need more funding for R&D and IP filings, etc. In a broader view, both could get huge benefits.
